

Legion W. A. Hold Meeting

The regular meeting of the Women's Auxiliary to the Canadian Legion B.E.L. was held in the Legion Hall Thursday evening with some 30 members present.

The president, Mrs. H. Bogtje, presided over the meeting and usual procedure of business was conducted.

A letter from the Rockford W. A. was read inviting the Auxiliary to attend their anniversary on August 21st. Approximately 25 members plan on accepting the invitation.

A letter from A. Horn, secretary of the town, asking the Women's Auxiliary if they would sponsor a banquet for the Gleichen Chamber of Commerce on August 14th. The banquet was postponed once so the same committee will be in charge of banquet.

Mrs. Lester resigned from the town looking after car for W. A. and Mrs. Hutton offered to take over.

After some discussion the members decided to invite Stratton, Rockford and Standard to a social evening on September 13.

The meeting adjourned and was followed by the march of dimes. Mrs. Holt won the contest. A pleasant evening was spent over a delicious lunch.

UNIVERSITY EXPANDS IN CALGARY

In accordance with the recent decision by the Provincial Government to expand the Calgary Branch of the University, the board of governors have approved the offering of first year courses leading to the degrees of B.A., B.Sc. in Arts, and B.Sc. in Nursing. This will also provide the first year of university work for students seeking admission to the Faculty of Medicine, Dentistry and Law at the university's main branch in Edmonton.

Subjects taught in the Faculty of Arts and Science will include English, French, History, Political Science, Philosophy, Mathematics, Physics, Chemistry, Botany, Zoology, and Physical Education with the possible addition of German and Latin. Five additional staff members will be appointed to provide instruction in the expanded program. Additional clerical and technical staff will also be named.

Teacher training courses in the Faculty of Education will be continued as in past years.

Students wishing to enroll in any of the programs available in the Calgary Branch are advised to apply to the University Registrar in Edmonton indicating their desire to obtain their instruction in the Calgary branch. Further information may be obtained from the Registrar on all problems connected with university registration or instruction.

Estimating the crop yield. By the time this article is published first yield estimates will be available. In considering these estimates it must always be kept in mind that what they show is not an estimate of what the harvest will be in bushels but of what the yield per acre looks as though it might yield at the time the estimate is made; we must remember that adverse conditions can easily reduce the yield by harvest time. Last year first estimates were reduced in wheat alone by 82 million bushels because of the drought that came after the first estimates were made. This year's crop was seeded on the average of 10 days later than usual. This means that the crop will probably mature one week later, which means one week's extra hazard of frost, and let us make no mistake it is a severe hazard. This will be realized when we consider that governments and plant establishments spend millions and millions of dollars trying to produce a variety that will be as little as two days earlier than the older sorts. In producing varieties that are earlier our plant breeders, therefore, are performing a most important service to farmers, to feeders of livestock and to hungry people of the world who require food.—World of Wheat.

This is just the right size town to settle down in and enjoy life. Everything for the comfort of life is brought here. When you want to leave the farm, come to Gleichen and build a nice comfortable home and be among the best people in the world.

Mr. and Mrs. A. Bogtje and family spent last week holidaying in the western United States.

Mrs. Miller who was badly bruised and shaken up when she fell out of her couple of weeks ago is at her home and is rapidly recovering from her injuries.

Rev. Fr. Ruax of St. Victor church was taken to a Calgary hospital last week suffering from illness.

Miss Lois Congrove of Los Angeles, Calif., is visiting Mr. and Mrs. Bubhr for a few days.

Here is a bit of news. Dr. McIntyre paid one of his rare visits to the city one day last week. Dr. says Calgary has grown considerable since he was there many, many moons ago.

A local business man says that we should not talk so much about money in this town, since there isn't enough to talk about.

The Gleichen Legion will not stage a fall race meet this year. The members decided that everybody was too busy at the present time to attend horse races.

A politician was being interviewed by the press. One reporter asked, "Do you feel that you have influenced public opinion, sir?" "No," he answered. "Public opinion is something like a cat. I can own it. In order to keep up the appearance of being the driver, I had to watch the way he was going and follow closely."

Dave Curtis is a guest at Eventide Home and Mrs. E. Hansen had their photo in the Salvation Army paper War Cry last week. This paper is printed in Toronto and circulates all over Canada and the British possessions in North America. Miss Hansen is the young daughter of St. Major and Mrs. Hansen of the Salvation Army at Eventide Home. Almost everybody in town knows Dave Curtis. He is almost blind and has frequently been seen on the streets in town. Mr. Curtis has been living at Eventide Home for the past twelve years. He was born on November 7, 1884 and when he reaches his next birthday will be 67 years of age. He is a very active man for his age, in fact as active as many a man in his sixties. His mind is just as clear and active as his body. He is a Scotchman, having been born in Scotland.

E. G. Varnell
R.C.M.P. Officer

Mrs. Varnell returned last week from Regina where she went to attend the graduation ceremonies of her son, E. G. Varnell who is now a R.C.M.P. officer. A Regina paper speaking of the colorful event says in part as follows:

Twenty-seven rookie Mounties passed their drill and physical training tests Tuesday before Supt. J. C. Storey, officer in charge of the R. C. M. P. depot training division, and became full-fledged constables.

The ceremony was held at the R. C. M. P. barracks on Dewdney Avenue.

Some 300 persons watched attentively as the squad marched through its paces with machine-like precision.

Prior to drill inspection, Supt. Storey explained the meaning of the exercises to the visitors.

"These men have completed six months of intensive training here at the barracks," he said. "It is now up to them to prove to me their ability in drill and physical training exercises."

At the conclusion of the drill exhibition, which lasted almost half an hour and was executed without a flaw, 300 depot division personnel marched past Supt. Storey.

The R.C.M.P. band played at intervals during the ceremony.

Scotland. Dave is a humorous sort of a fellow. On day one hour or so after dinner the writer met him and asked how he was feeling. He replied, "Fine. I'm just waiting for my supper."

Rain fell Sunday night and Monday morning thus setting back the time when harvesting operations should begin. Throughout the district a wonderful crop is in prospect if it is not damaged by frost.

Red Cross swimming and water safety men are now touring the province, examining the candidates who have been receiving swimming and water safety knowledge from their local instructors. Where possible, demonstrations for parents and other interested persons will be given in addition to the examinations. Swimming and water safety movies will also be shown in centres where they have not been screened previously. Mr. L. Robertson, field organizer will be in Gleichen on August 15.

Last week great progress was made by the trucks hauling gravel for the Trans Canada Highway. Some days these trucks ran from daylight until darkness set in. It is expected that the blacktop will be laid shortly.

COOL, COLORFUL FRUIT SALADS

... Wh...at could be more colorful or have more eye appeal than a fruit salad? When anyone is completely worn out or seems to be lacking appetite, a fruit salad will usually tempt them. The home economists of the con user section did considerable experimental work on suggestions for salads for Canadian homes. After all their salad recipes were made and tested, it was decided by which Mrs. Housewife should plan to use as the basis for fruit salads and of course, fresh fruit salads should be served as long as the season.

Generally fruit salads are very low in calories, so if any member of the family is watching his waist line, the desert problem may be solved with a fruit salad. However, this type of salad does not necessarily have to be the desert course. It is the main course and the appetizer. If the salad is to be the main course it should be accompanied by a filling food such as cottage cheese, cream cheese, or peanut butter, while the appetizer should taste the appetizer for the food which is to follow, so here the combination of fruits should be light and tart.

Cherry cottage cheese salad, 2½ cups pitted and halved sweet cherries, 1 cup cottage cheese, lettuce or water cress, salad dressing or mayonnaise. Mix the cherries with the cottage cheese. Serve on shredded lettuce or

water cress. Garnish with salad dressing and serve well chilled. If cherries are not available raspberries may be substituted. When served with buttered toast, hot muffins, or tea biscuits it makes an ideal luncheon salad.

Brides Elect Receive Showers

The Recreation Centre was the scene of a miscellaneous community shower, when some 50 ladies met to honor Miss Elly Jensen, bride elect of August 17, Wednesday afternoon. Co-hostesses were Mrs. Herd and Mrs. Cameron assisted by Mrs. Hutton, Mrs. Jones and a few young ladies, who served a delicious lunch.

The honored guest was the recipient of an overflowing table of lovely and useful gifts. Miss Jensen unwrapped her gifts assisted by Mrs. L. Wilson. The gifts were put back on the table to see and then put back on the table by Miss Wallace and Miss Hutton.

Elly thanked her many friends for all their generosity and kindness, and invited all to come and have a cup of tea with her when she gets settled and as a joke said she might give them a sandwich. A pleasant afternoon was spent visiting. The good wishes of the community are extended to Elly for continued happiness.

For the second time in a week the Recreation Centre was the scene of a very nice community shower and social evening on August 10th, when around 40 ladies gathered to compliment Miss Gwen Morrison, bride elect of August 14.

In the way of entertainment three contests were held. The winners of the contest were: Mrs. Herd and Mrs. Desjardins, Mrs. N. McMillan and Miss P. Warner.

A delightful lunch was served by the ladies of the W. A. and the showering of gifts followed.

The honored guest was the recipient of many useful and lovely gifts. Miss Morrison unwrapped her gifts, assisted by her mother, and her friend Miss Pauline Stenmeister and Mrs. Herd were passed around for everyone to admire. Gwen very graciously thanked everyone for the lovely and useful gifts and invited all to come and see her.

The good wishes of all are extended to Gwen and Victor for continued happiness in future.

Despite the current country's fantastic mechanical progress hand signals with arm, flag or lantern, remain an essential part of train operation in Canada.

Height of the Rock of Gibraltar is almost 1,500 feet.

A motorist pulled up outside a filling station on which there was a sign: "Under New Management." "But," said he, "there's the same manager sitting in his office." "Yes," said the attendant, "but he got married this morning."

Keystone of Main Street

Where livestock and rolling stock meet there's sure to be a Western town. Beef and wheat and railways—and The Commerce on the corner.

That's the story of lots of Canadian towns.

But the real story is about the people who built the town. You and your Commerce manager... He and the men and women who work with him know their job: to give you Commerce service—the kind of banking service that's the keystone of community progress.

Remember, whatever your banking needs, the men and women at your Commerce branch are good people to know.

The Canadian Bank of Commerce
"The Commerce"

Industrial Accidents

AS CANADA HAS EXPANDED INDUSTRIALLY there has been growing concern over the danger of industrial accidents and in almost every plant or factory today there are safety engineers, whose duty it is to make workers safety-conscious and to cut down in every way possible, the number of accidents. Last year, there were 20,084 claims registered with the Workmen's Compensation Boards in Canada, and there were 1,011 deaths resulting from industrial accidents. It is estimated that 1,500 workers are absent each day because of injuries received while at work. While industrial accidents are mainly associated with factories and large construction projects, the widespread use of agricultural machinery has given rise to a growing number of accidents on farms.

Workers Must Be Educated

In 1948 there were 1,350 fatal industrial accidents in Canada and of these 94 were listed as having happened on farms. This was seven per cent. of the total number of industrial accidents in that year. Carelessness and disregard of safety rules are said to be the cause of a great many industrial accidents. Familiarity with a machine or with a tool often leads the worker to become careless in using it, and the need for education of workers in these matters is considered great by those interested in promoting safety in industry. Recently the National Safety Council of the United States issued a list of safety practices recommended to reduce the number of accidents on farms.

Is Important On The Farm

Farmers were advised to keep machines in good repair, to exercise caution when handling kerosene and gasoline and to observe safety rules when driving farm machines or vehicles. Farmers were also advised to observe caution with ladders and with firearms. The advisability of knowing first aid and of having first aid kits available for treating injuries was also stressed in an article in other industries accidents result in loss of time from work and sometimes in damage to machinery and other equipment, in addition to personal discomfort and expense. Safety-consciousness and intelligent interest in removing the causes of accidents whenever possible, has become an important factor in modern industry and it is as important on the farm as in the factory or on great construction projects.

To taste it is to prefer the superb quality and flavour of

"FISH TAIL"

FOOD FOR TEN-YEAR-OLD BOY COSTS PLENTY

SPRINGFIELD, Colo. — Herman James Mason is doing all right for a lad of 10 years. He weighs 207 pounds. He is 50 inches around the waist and wears a size 12 shoe and a size 16 shirt. Herman's usual breakfast consists of six eggs, two cups of milk and a pound of bacon. The other meals are proportionately large, and his breakfast for a week comes to about \$50. His father is a hardware store clerk.

Law Is Strict When It Comes To Signatures

SYDNEY, Australia. — An ex-convict's last wish to leave all his possessions valued at more than \$100, to a lifelong woman friend was nullified here when he died in the act of signing the will.

A justice of the peace and other witnesses were present when the man began to sign the document, but collapsed and died after writing his last wish.

As he had no relatives and no dependents, he is officially assumed to have died intestate. Proceeds of the sale of his real and personal property will be transferred to general revenue.

A. A. House, Deputy Public Trustee, explained that a will is not valid unless signed by witnesses in the presence of the executor. Even if the testator lost consciousness while witnesses were signing, the will would not be valid.

One Accomplishment That Is Neglected

About this time every summer employers discover that graduates of universities and high schools cannot spell according to the Windsor Star. They fail to put together correctly the letters forming even simple words of two syllables. When they attempt to go beyond that, they are lost. Why spelling is not taught more diligently in the schools is a mystery. It is an essential in business, yet so many young men and women have to learn to spell after they begin their business careers. They either are not taught or do not learn in the classrooms.

POCKETKNIFE WEIGHS OVER HALF POUND

PONTIAC, Mich. — Elton Montgomery, 12, can do just about anything he wants to with his pocketknife. It has a screwdriver, a pair of pliers, a bottle opener, a can opener, a leather punch, a file and corkcutter and two cutting blades, one of them 3½ inches long. The knife weighs more than half a pound.

NEW REQUEST AT SWIMMING POOL

KITCHENER—Robert Cardy, superintendent at the Kitchener Municipal Swimming Pool, has been asked to keep all kinds of trinkets for children entering the pool, but recently for the first time one asked him to "hold my tooth." The tooth had been pulled en route to the pool and its owner wanted it for a keepsake.

Buttermilk is not considered fattening.

Selected Recipes :

Here's a dessert that will be a favorite with the family. Creamy blueberries and creamy vanilla pudding make a delicious ending to any meal. For special occasions, whip cream and shredded coconut, and you'll have a pie with a future!

BERRY CREAM PIE

Two cups vanilla pudding, 1 baked shell, 2 cups blueberries, 4 cup water, 4 cup sugar, dash of cinnamon, dash of salt. Mix together sugar, cinnamon, salt and water. Boil and sweetened, 4 cup shredded coconut. Make your favorite "sanding" recipe, cool slightly and add to pie shell. Cook. Mix with berries and combine blueberries and water in a saucepan; bring to a boil. Stir constantly. Remove from heat and add lemon juice. Stirred at once over top of cooled pie. Chill. Just before serving, spread with whipped cream and sprinkle with shredded coconut. In these days of high food costs try to use as many berries as possible. They provide good eating throughout the summer months, and their incomparable flavor will linger with us in preserves, jams and jellies until the berry-picking season comes again.

Canada Now Planning To Import Butter

OTTAWA.—Agriculture Minister Gardiner announced that the government will try to prevent a possible shortage next winter by importing 10,000,000 pounds of butter. He told a press conference that the government will be made by the newly-established board in addition, the board has been given the power to import another 10,000,000 pounds if production falls below current estimates. Meanwhile, the board will be closed to all imports of butter by private trade, with the new board becoming the sole importer until further notice. To those private traders who already have taken steps to import butter, permits will be issued to enable them to complete transactions undertaken before Aug. 1. In addition to these steps, Mr. Gardiner said the new board also has been given authority to buy a small amount of first-grade Canadian creamery butter over the government support price of 60 cents a pound wholesale. Butter prices currently are ranging between 62 and 64 cents a pound wholesale, basic delivery Montreal.

The minister said that up to the moment, no butter has been offered to his department at the support price of 60 cents.

He made no definite statement on where the imported butter will come from, but indicated that he hoped to get some from New Zealand, Australia and possibly the Netherlands. Reviewing the butter situation, he said the facts of the current situation are that production, storage, stocks and consumption are all lower than the average of recent years.

Funny and Otherwise

Teacher: "Butter is dairy produce. Can you name anything else that comes from the dairy?" Pupil: "The milkbox, sir."

The husband arrived home one evening and gave his wife an insurance policy. "I've insured my life for ten thousand dollars," he said, "so that if anything happens to me, you will be provided for."

"How thoughtful of you," beamed his wife. "Now you won't have to see a doctor every time you feel ill, will you?"

"I don't know," said the English visitor. "Well, instead of saying 'Hello,' we say 'Are you there?' Then, of course, if you're not there, there's no use going on with the conversation."

"Jack isn't going to marry Sally, after all."

"Yes, but he took a second look."

"The rain, it fellth on the just and on the unjust alike. But mostly on the just because The unjust hath the just's umbrella."

"Young man," said the old man severely, "when I was your age I, too, thought I knew all. Now I've reached the conclusion that I know very little."

"Great Scott!" exclaimed the lad in astonishment. "Was it taken on your this long to find that out? Why, I knew it the minute I saw you!"

"The scene was a modern laundrette and customers were watching through the windows of the machines their washing being churned round."

Two somewhat intoxicated men strayed in by mistake. Field one "What awful tripe they put on the television these days."

At a seaside boarding-house a guest was waving away at a slinky kneel-cap of a roast chicken. At last, waving an arm towards a bottle of sauce on the table, near the landlady's elbow, he said: "Pass the ketchup, please, Mrs. McPherson. This seagull has rheumatism."

"Am I really the first girl you've really kissed, John?"

"Yes, darling, though naturally, I've rehearsed with others."

Oil Sands in Alberta To Be Studied

EDMONTON.—Nearly 100 representatives of the world's leading oil companies are expected to attend Alberta's symposium on northern oil sands in September.

The northern Alberta sands represent one of the world's largest reserves of oil.

As yet untapped, the sands have been experimented on for years by scientists seeking an economical method of separating the asphalt mixture of sand and oil.

The Alberta government has invited one of the world's largest oil companies to attend the symposium, which will give technical details of all phases of oil sands development.

The delegates will be flown to Edmonton from the northwestern Alberta to inspect the workings of the Alberta government's pilot plant there.

The Anglo-Canadian Oil company of Great Britain is reported to be one of the firms interested in constructing a multi-million-dollar plant to extract oil from the sands.

Industries Minister J. L. Robinson said international interest in the oil sands is "increasing".

ODDITIES IN THE NEWS

Thieves who raided a house in Tippecanoe, Hampshire, England, really tipped. Occupants who slept undisturbed found next day the intruders had taken time to boil and eat some eggs.

Two anglers at Durban, South Africa, baited their hooks at the same time, cast at the same time and both got simultaneous bites. Both lines surfaced at the same instant to show they had both hooked the same fish—a 4½-pound salmon.

When lightning in Theunissen, South Africa, struck Farmer Haim Venter, his artificial leg conducted the dash into the ground and saved his life. Two Africans working with him were killed.

Time flies, but it usually doesn't explode. An electric clock in a garage at Hastings, Neb., exploded mysteriously and sent parts flying all over the room.

Twenty-four hours after he visited his 10-year-old twin sister in the New Bedford hospital, where she underwent an appendectomy, Monroe Macrae was admitted there for the same reason.

If wood is completely submerged in water, it just keeps rotting away at all times. It will not decay.

Flavor! Nutrition! Econom-e-e!

Blue Bonnet Margarine gives ALL 3"

Once you taste the country-sweet flavor of Blue Bonnet... once you enjoy its delicate farm-fresh goodness... you'll know you've found the sweetest, easiest spread of 'em all.

And there's more than that in its favor. Blue Bonnet gives proved nutritional value from choice farm products with 16,000 units of Vitamin A and 400 units of Vitamin B1. Blue Bonnet is wonderfully economical. Use it for all your spreading, frying, baking and dry extra milk with the money you save!

Blue Bonnet, one of America's largest selling brands, is now made in Canada. Try some today!

Korean Children Enjoy Party Given By Press Correspondents

(By Bill Ross, Canadian Press Staff Writer)

SEOUL, Korea. — For money was cold but few had been chosen. . . A thousand disappointed children melted into the blackness of the night, the insistent clamor for admission they had waged for two hours transformed into a wall of disappointment. They'd been invited to a party. There had been one, too. They had seen it—from the outside.

Peering through the windows of the big dining room they had seen the tables, set for 90 guests. . . Hungrily they had watched the men empty and fill again, twice, and the white-jacketed waiters bring on the meal.

Hosts were the war correspondents in Seoul. A European reporter had passed the bill: \$125, a fortune in this country. It was decided to entertain 250 youngsters to a meal. Prizes and souvenirs would be distributed afterward.

The first snag was in getting food. The United States Eighth Army in Korea turned down their request to buy supplies.

But the British N.A.A.F.C. (Navy, Army and Air Force Institutes) threw open its stores. Fresh bread was obtained unofficially from the correspondents' own mess stewards.

It could have been an excellent party for 250—which it was.

But many, many more undernourished kids, feasting on the sight of good things appearing in store here.

I Was Nearly Crazy With Fiery Itch—

Small advertisement text about a skin condition treatment.

Average Is High

EDMONTON. — An average of 37 percent daily receive blood transfusions in Edmonton, Red Cross Commissioner Robert McRae recently.

Travels In Style

PEMBERTON, B.C. — When William Stewart, superintendent of the Pacific Great Eastern Railway, by car—his 400 miles of line, he travels by car—and on his railroad tracks. Steel steel flanges hold the rubber wheels of the 1937 car on the rails.

Saskatchewan Man Joins U.N. Research Body

SASKATON. — A Saskatchewan man will join the food and agricultural organization of the United Nations in a research body.

Dr. George Dine, a member of the University of Saskatchewan's department, will take up residence in Rome, Italy, to join the F.A.O.'s technical assistance program for underdeveloped parts of the world.

His wife, a fungus expert with the prairie regional laboratory at the university, will accompany him.

Dr. Dine joined the soils department in 1944 and later went to Rothamsted experimental station in England to do soil research in connection with wartime food production. While there he married Wendy Ritchie, a London University graduate.

After leaving Rothamsted, Dr. Dine spent a year with the Macdonald Institute at Aberdeen, Scotland, before returning to Saskatchewan in 1946.

His work with the F.A.O. will help African and Asiatic countries develop their programs of soil mapping and classification and survey work connected with soil fertility.

Dr. V. Ignatieff, a University of Alberta graduate is doing similar work for North and South America in Washington for F.A.O.

SASKATCHEWAN IS SEARCHING FOR OIL

REGINA. — Work was under way 14 wildcat exploratory wells and 20 core holes in Saskatchewan during June, according to the natural resources department's monthly oil production report.

Cone holes are drilled to verify seismic findings.

In the same month, 111,619 barrels of oil were produced from 173 wells, mainly in the Lloydminster and Lonsdale fields. During the first six months of this year, 579,685 barrels of oil have been the net production in Saskatchewan.

Farmers Shifting To Coarse Grains

OTTAWA. — Canada's prairie farmers are shifting their production this year from wheat and barley to coarse grains and flaxseed, the bureau of statistics reported.

In a preliminary estimate of areas sown to field crops, it estimated that the 1951 spring wheat acreage has declined to 1,000,000 acres from 9,093,000 last year while summer-fall has declined to 20,312,000 from 20,968,000.

On the other hand, acreages sown to oats and barley were up.

Awards Made In Newspaper Competition

Installation of the president-elect, Stirling King, of the Eastern Mercury, and the presentation of trophies to the winners of the "Better Newspaper Competition," highlighted the closing session of the annual convention of the Saskatchewan division of the Canadian Weekly Newspapers association of Saskatoon.

A unique event took place when Andrew King, a past president of the association, installed his son, Stirling, as the new president. In doing so he presented him with the same gavel which he himself had donated to the organization 20 years before. In accepting his new post Mr. King said that he would do his best to give at least partial credit to that office.

It will try to follow in the footsteps of a great man, good man, he said. He succeeds George Lancaster of the Melior Journal.

Dr. R. H. Stevens, Shaunavon Standard, was named vice-president; Walter Ashfield, Grandin Sun, was re-elected secretary-manager; Peter Dine, Tisdale Recorder; Ken Mayhew, Yorkton Enterprise; and Walter Taylor, of the Humboldt Journal, were appointed to the executive for the coming year.

At the dinner, sponsored by the branch of the Imperial Oil company, the winners in the newspaper competition were announced.

The winning award for the best all-round newspaper with circulation under 500 went to the Milestone Mail.

The Troughwood Times and the Liberty Press third in the same class. The grain and milling yard for the best newspaper with a circulation of between 500 and 2,000 was won by the Grandin Sun. The Shaunavon Standard was second and the Humboldt Journal and Indian Head News were tied for third.

The Printed Word trophy for the best all-round newspaper with a circulation of over 2,000, went to the Swift Current Sun, with the Yorkton Enterprise and Eastern Mercury second and third respectively.

The Yorkton Enterprise captured the Dominion Textile award for the best editorial page. The Swift Current Sun was second, and the Eastern Mercury was third.

The Troughwood Times and the Liberty Press were tied for second and third respectively.

The Yorkton Enterprise captured the Dominion Textile award for the best editorial page. The Swift Current Sun was second, and the Eastern Mercury was third.

Man Operates Floating Store On West Coast

VANCOUVER.—Mr. and Mrs. Bill Graham are doing a flourishing business with their floating department store, playing between communities along the British Columbia coast.

Three years ago Bill bought a rotting schooner hull that had been abandoned, half full of water, on the beach. With the aid of his father he repaired the vessel and built a plywood and cedar superstructure.

Beginning his second year afloat, he set out this summer with his wife and three children for a two-month cruise northward with a \$10,000 stock of goods.

Different store departments are scattered along much of the cruiser's 75-foot length. Long lines of tapestries hang from a metal frame. There are racks of men's blue denim, work socks, nylon shirts, boys' and girls' shoes and lingerie.

There are also candies, watches, alarm clocks, costume jewelry and many other items including soft drinks. The latter are especially popular in Indian settlements.

They'll see old friends like Chief Henry Speck on Turnor Island, Old Hansen at Lagoon logging camp up the Minster and all the gang at Alert Bay.

GRAIN SHIPMENTS HIT RECORD AT VANCOUVER PORT

VANCOUVER.—Shipments of grain from the port of Vancouver during the crop year ending July 31 were at a post-war peak.

H. H. Smith, manager of the Canadian wheat board, reported more than 65,400,000 bushels of wheat left here for world markets during the year. In addition, 3,000,000 bushels of barley moved from here.

Wheat shipments for the 1949-50 crop year totalled 61,096,000 bushels. United Kingdom, India, Japan and South Africa were the best grain customers.

The first watches were made in Nuremberg, Germany, in 1476.

WHAT DO AMERICAN TOURISTS WANT?

When our American friends come to Canada they are visiting a foreign land. They want to have the feeling that this is a nation different from their own.

They do not want the Stars and Stripes waved in their faces, proud of their own flag though they are. Canadians who drag out the American flag on every possible occasion and some impossible ones do so with the idea that they are being courteous to American visitors. This is not the case. The only time the American flag should be flown in this country is at some joint Canadian-American undertaking. To fly it at any other time is bad manners. American tourists want to see the Union Jack or the Canadian Ensign flying in Canada, not their own flag.

Canadians should get away from the idea that Americans are flattered when we name our restaurants "The New York Biscuits" or use some "New American" name for our tourist enterprises in the hope of enlivening tourists to come in. Cheap imitations do not make an American visitor feel at home. There are fine Canadian names which are seldom seen. Canadians perhaps should get to know their own history better.

We must do everything we can to build up a sound reputation for hospitality, to smooth the way for American visitors to get full value for the money they spend here. And most important, we must be ourselves.

American tourists want to get to know Canada and Canadians. We must impress them with the fact that we are a courteous, fair dealing people, glad to welcome them to our country.

Town & District

Miss Peggy Perry of Norridge, is at present visiting Mr. and Mrs. S. Hall.

Mrs. C. R. McIntyre was a visitor to Medicine Hat for a day or so last week.

Melvin Service has returned to town after spending several months at Vancouver.

For several days last week Town Engineer Jack Lester and C. Gilman were busy picking up all the big boulders that littered the main street after it was gravelled. As a result the roadway and crossings are much easier on the corns. Since the gravel was laid it is being gradually pressed down with the traffic passing over it. It will be regraded again before the crushed gravel is spread on top of it. Now it is possible to get out of a car anywhere on Crowfoot Street without stepping in to mud holes to the detriment of polished shoes.

John H. Hendrickson, a resident at Riverside Home for the past two and half years died last Wednesday morning. He was born in Sweden and had lived in the province for the past 38 years. By trade he was a farmer and came to Gleichen from Stettler. The funeral took place last Thursday afternoon at 1:30 with St. Capt. Hansen of the Salvation Army officiating. Interment was made in Eventide cemetery.

Ted Krause was a visitor to Edmonton last week. He had a farm north of Edmonton and while in the northern city traded his farm for a caterpillar tractor. Sunday night he left with Cam Evans for Vauxhall where he hopes to put the cat to work on the ditches and canals being constructed there for irrigation purposes.

Ever since Adam and Eve were turned loose in the Garden of Eden the eating problem has been in vogue. It doesn't matter whether it's hot or cold, wet or dry, every man, every woman, every child, so far as we know eat three square meals per day. The cost of various commodities is an item worth considering. Vegetables here have only been excellent in quality but plenty. Because of this the eating problem, so far as it has to do with vegetables, has been reduced to a minimum. Eggs in town of this size are always cheaper than in a city. Rent to him to be taken

into account when one is figuring up the cost of living. The same house in a city would bring four and five times that amount. It stands to reason that one can live here and enjoy every luxury of life for much less than it would cost in a city. And life here is worth the living too. For there is a cordiality about the people that one cannot but enjoy.

He's a going concern!

BILL IS ANOTHER enterprising boy who is learning to appreciate the value of saving for what he wants. Each week, he puts a part of his spare time earnings in the bank. And he is proud of his bank book!

Many a businessman credits his success to the habit of thrift learned early in life. Planned saving has helped millions of Canadians to make the most of their own enterprise and industry.

Experience has shown that the difference between "getting along" and "getting ahead" often starts with a bank account. Use the chartered bank in your neighborhood as a safe and handy place to make your savings grow.

One of a series by your bank

A Farm Storage Tank Makes Dollars and Sense

Like many other sound investments, a farm storage tank more than pays for itself in dollars. Here is why it makes sense!

1. **Helps Prevent 75% of Fuel Troubles**—Proper storage and handling is most important. For cleaner fuel, raise the nozzle end of the storage tank to allow any sediment to accumulate at the lower end where it can be removed.

2. **Prevents Waste**—Fuel is easily spilled or left in the bottom of a barrel whether you use a pump or a pump. With a storage tank gravity does the work for you.

3. **Lessens Fire Hazard**—Gasoline in a farm building creates a serious fire hazard. A storage tank located some distance from farm buildings complies with fire insurance regulations.

4. **Convenient and Safe Filling**—Fill your engine fuel tank with a gravity hose. In busy morning your fuel is there when you need it. There is little deterioration in quality during the winter or other busy season if your tank is full.

SEEDTIME AND HARVEST

By Dr. F. J. Grayson.

Like thousands of farm families, you may be wondering how to get the most out of your seed. This book tells you how to get the most out of your seed. It tells you how to get the most out of your seed. It tells you how to get the most out of your seed.

To grow a first class grain crop and then to reduce its quality, and hence its value, through the use of faulty harvesting and threshing methods, just doesn't make good sense. Grain should be handled carefully to avoid market discounts. Combine-Harvest Problems. The introduction of the combine has meant a substantial decrease in harvesting costs. Nevertheless, combine-harvest is not without its problems. One of the most important of these is the tendency for combine operators to "beat the gun" and start harvesting operations before the grain has reached full maturity or is a dry enough. It is a well established fact that the grain before it is entirely ripe means a sacrifice of yield with no advantage as to quality. One important thing to remember at harvest time is that an excess of either under or outside moisture is potentially damaging to grain quality.

Prevent Losses Improper threshing can be very damaging to the quality of grain crops, particularly milling barley. In harvesting and threshing, therefore, every effort should be made to eliminate any real injury to the kernels (splitting of whole, peeling and breaking of barley, and cracking of dry seed). Such damage can be largely prevented if farmers and combine operators will take the time and the care to adjust their combines to threshing machines for quality. Threshing. Slow cylinder speeds and proper adjustment of cylinder, concaves, sieves and winders will reduce the amount of damaged kernels. Do not run the cylinder of your combine or threshing machine faster than is necessary to get the grain out of the heads.

Losses due to improper harvesting and threshing represent not only a hard investment loss, but also a loss of man and machine power. In these days of high prime costs, no farmer can afford losses of this kind. Care in harvesting will help any western farmer realize the highest possible return for his 1951 grain crop.
